BAR CODE SCANNING:

Data Magic® provides for bar code scanning to **automate** counter check-out, creating invoices that reduce your inventory and integrate with accounting. It accepts payment by cash, check, and credit-card or on-account charges for regular customers.

“Remote Data Collection” with a handheld scanner is faster and eliminates errors. Improve the taking of actual inventory counts and reduce errors with a remote handheld scanner.

Includes receiving, shipping and return scan capability.

Reduce shrinkage and eliminate mistakes when using bar code scanning.

Bar Code Scanning Features:

- **Data Magic®** has a powerful and user friendly Bar Code Scanning system.
- Seamlessly links with Inventory Accounts Receivable and Accounting.
- Scan Inventory Items at the Counter or Showroom floor for **Point of Sale** sales.
- Barcode labels work with counter or remote scanners.
- A salesperson can switch the remote scanner to make Sales-Invoices or Proposals.
- The warehouse can use the scanner to take Inventory, Receive or Ship goods.
- Prints barcode labels by themselves or with your PO's to automate receiving.
